Index A–C

Review key: number = book · T = techniques · C = cultivation. T/C references are temporary.

A

Allium leaf miner 132
Anthracnose 107, 123, 125
Aphids 128, 136, 144
Aphids, black bean 105
Aphids, carrot-willow 117
Aphids, mealy 112
Aphids, pea 105
Aphids, root 128
Artichokes, globe 92–93
Artichokes, Jerusalem 8–9
Asparagus 94–95
Aubergine 70–71
Autumnal fungal root rots 109

B

Basal stem rot 124
Beans, broad 42–43, 104–107
Bean seed fly 104
Beans, French 44–45, 104–107
Beans, runner 46–47, 104–107
Bed layout T4–T5
Beds, raised greenhouse T7
Beet, leaf 50–51, 140–141
Beet leaf miner (mangold fly) 109
Beetroot 10–11, 108–109
Bird damage 104, 110, 147
Birds pulling sets 130
Bitterness 122
Blackfly *see* Aphids, black bean
Blackleg 108, 136
Black rot 113, 117, 124, 148
Blight, potatoes and tomatoes 135, 138, 143, 146
Blossom drop 145
Blossom end rot 144
Blotch 123
Blotchy ripening 145
Blown Brussels sprouts 114
Bolting 108, 119, 126–127, 130, 133, 140, 147
Boron deficiency 115, 148

B continued

Botrytis *see* Grey mould (Botrytis)
Broad beans *see* Beans, broad
Broccoli 32–33, 110–115
Brown heart *see* Boron deficiency
Brussels sprouts 34–35, 110–115
Buckeye rot 146
Button cauliflowers 114

C

Cabbage 36–37, 110–115
Cabbage root fly 113, 134, 148
Cabbage stem flea beetle 115
Cabbage whitefly 112
Capsicums *see* Peppers (capsicums)
Capsid bug 136
Cardboard, starting a bed C2
Carrot fly 116
Carrot motley dwarf 117
Carrots 12–14, 116–118
Caterpillars 147
Caterpillars, cabbage 111, 133
Cauliflower 38–39, 110–115
Celeriac 16–17, 119–120
Celery 96–97, 119–120
Celery fly (leaf miner) 120
Celery heart rot 120
Celery leaf spot (blight) 119
Chafer grubs 113
Chard *see* Beet, leaf
Chicory 52–53
Chocolate spot 106
Clayburn 116
Clubroot 111
Colorado beetle 139
Common scab 137
Compost, bins T10
Compost, ingredients and moisture T11
Compost, making and using T10–T11
Compost, sowing and potting mix T11
Containers, greenhouse growing T7

Index C–K

Review key: number = book · T = techniques · C = cultivation. T/C references are temporary.

C continued

Courgettes and marrows 74–75, 121–125
Crop rotation T9
Cucumber mosaic virus 122
Cucumbers, greenhouse 76–77, 121–125
Cucumbers, outdoor 78–79, 121–125
Cucurbits, poor yield 121
Cultivation, choosing a method C1
Cutworm 114, 129, 144

D

Damping off 119
Diamond-back moth 112
Digging, double C3–C4
Digging, single C3
Downy mildew 107, 113, 128, 132, 140
Drainage T3, T12
Drooping leaves 131
Dry rot 138

E

Eelworm 125, 128, 143
Endive 54–55, 127–129

F

Fanging *see* Forked roots (fanging)
Fennel, Florence 98–99, 126
Finger and toe *see* Clubroot
Finger paths T5
Flea beetle 111, 133, 147
Florence fennel *see* Fennel, Florence
Flowering, absent 104
Foot rot 143
Foot rot and root rot 107
Forked roots (fanging) 108, 116
French beans *see* Beans, French
Frost damage 115, 126, 134–135
Fruit set, cucurbits 121
Fruit set, tomatoes (dry set) 145
Fusarium wilt 107

G

Gall weevil 113
Gangrene 138
Gapping 135
Garlic 62–63, 130–132
Germination, old seed 116
Ghost spot 146
Globe artichokes *see* Artichokes, globe
Greenback 145
Greenfly *see* Aphids
Greenhouses, choosing and siting T6
Greenhouses, growing options T7–T8
Greenhouses, seasonal use T8
Greenhouse whitefly 144
Green top 116
Grey mould (Botrytis) 107, 123, 128, 143
Growbags *see* Containers, greenhouse growing
Growth checked by dry soil 126
Gummosis 123

H

Halo blight 106
Hardening off T13
Hearting, cabbages 114
Hearting, dry soil 133
Hearting, lettuce 127
Heart rot 109
Hollow fruit 145
Hollow heart 138
Hormone damage 146

J

Jerusalem artichokes *see* Artichokes, Jerusalem

K

Kale 40–41, 110–115
Keyhole beds T4
Kohl rabi 18–19, 110–115

Index L–R

Review key: number = book · T = techniques · C = cultivation. T/C references are temporary.

L

Leaf and pod spot 104
Leaf beet *see* Beet, leaf
Leaf-pattern paths T5
Leaf roll 142
Leaf roll virus 136
Leaf spot 108, 140
Leaf spot (ring spot) 110
Leek moth 132
Leeks 64–65, 130–132
Lettuce 56–57, 127–129
Lettuce root maggot 129
Lower sheath rot 126

M

Magnesium deficiency 115, 136, 146
Manganese deficiency 115, 141
Mangold fly *see* Beet leaf miner (mangold fly)
Marrows *see* Courgettes and marrows
Marsh spot 106
Mice 104, 125
Mildew, downy *see* Downy mildew
Mildew, powdery *see* Powdery mildew
Modules T13
Mosaic virus 129, 136
Mulching with compost C2
Mushrooms 102–103

N

Neck rot 132
No-dig, greenhouse T8
No-dig, starting a bed C2

O

Onion fly 130
Onions and shallots 66–68, 130–132
Organic growing T2
Oriental leaves 58–59, 133–134
Orientation *see* Shade and sunlight

P

Pak choi, root disturbance 133
Parsnip 20–21, 116–118
Parsnip canker 118
Parsnip rust fungus 116
Paths T4–T5
Pea and bean weevil 105
Pea moth 106
Peas 48–49, 104–107
Pea thrips 105
Peppers (capsicums) 72–73
Pigeons *see* Bird damage
Planting out T13
Plot, choosing a site T3
Plot, size and layout T3–T5
Pods, failure to set 106
Potato cyst eelworm 137
Potatoes 22–23, 135–139
Potatoes, poor quality 139
Potting mix *see* Compost, sowing and potting mix
Powdery mildew 107, 122
Powdery scab 137
Pumpkins *see* Squashes and pumpkins

R

Radishes 24–25, 147–148
Radishes, poor root quality 147
Raised beds, greenhouse *see* Beds, raised greenhouse
Red spider mite 123
Rhubarb 100–101
Ring spot 127
Root rot 124, 142
Roots, checked growth 148
Rosy rustic moth 137
Rotation *see* Crop rotation
Runner beans *see* Beans, runner
Rust 131

Index S–W

Review key: number = book · T = techniques · C = cultivation. T/C references are temporary.

S

Saddleback 130
Salsify and scorzonera 26–27
Sclerotinia rot 117, 123
Scorzonera *see* Salsify and scorzonera
Seed beetle 104
Seed sowing T13
Set division 130
Shade and sunlight T3, T5
Shallots *see* Onions and shallots
Shanking 132
Slopes T5
Slugs and snails 111, 120, 125, 128, 133, 137, 146
Small roots 117
Smothering weeds C4
Smut 131
Snails *see* Slugs and snails
Soft rot 138, 148
Soft tubers 135
Soil compaction C3
Sowing *see* Seed sowing
Speckled yellows 109
Spinach 60–61, 140–141
Spinach blight 141
Spinach, New Zealand (frost damage) 140
Spindly sprouts 135
Splitting, cabbage hearts 114
Splitting, roots and stems 117, 119, 135
Splitting, tomato fruit 144
Spraing 138
Squashes and pumpkins 80–81, 121–125
Squashes and pumpkins, ripening 125
Stem & bulb eelworm 131
Stem rot 124
Stem rot (Didymella) 143
Storage rot, stem damage 124
Sunlight *see* Shade and sunlight
Sunscald 121, 145
Swede 28–29, 147–148
Swede midge 112

S continued

Sweetcorn 82–83
Swift moth 118

T

Thick neck, onions (bull neck) 131
Tipburn 127
Tomatoes, greenhouse 84–86, 142–146
Tomatoes, outdoor 88–90, 142–146
Tomato leaf mould 142
Tomato moth 144
Transplanting *see* Planting out
Turnip 30–31, 147–148
Turnip mosaic virus 148

V

Verticillium wilt 124, 143
Vine borer 125
Violet root rot 118
Virus, tomatoes 142

W

Wart disease 139
Watering T12
Waterlogging T12
Weeds, clearing a new plot C2, C4, T3
Whiptail 114
White blister (white rust) 110
White rot (onions and leeks) 132
White rust *see* White blister (white rust)
White tip 131
Windowsill, raising seedlings T13
Wire stem 113
Wireworm 137
Withering of young fruit 121
Woody kohl rabi 110
